

NEC India launches its first biometrics excellence centre

BANGALORE: NEC India, integrator of IT and network technologies, on Wednesday officially launched its first NEC biometrics excellence centre in India (N-Bec). N-Bec will support NEC's engineering operations worldwide and enable the company to quickly respond to the wide variety of customer

requirements from proposal drafts and specifications to product development, customisation, deployment and support engineering. It will also develop and deploy solutions for the Indian market and play a role in expanding NEC public safety market in India, said Kris Ranganath, CTO, government and public global solutions, NEC corporation. "The core R&D work would continue at Tokyo", he said.
