NEC India launches 3D projector

Coimbatore, Aug. 23

Enterprise display solutions provider NEC India has marked its entry in the 3D projection space with the launch of its first 3D enabled DLP (Digital Light Processing) projector NP216G for the education sector. "This projector is ideal for business and education needs. It is light, portable and its performance ratio is perfect for use with interactive white boards (at school) and for delivering presentations at work," the Country Head (IT Platform and Display Solutions Business) at NEC India, Mr Abhilesh Guleria, said. The company is now strengthening its focus on the education sector. It is also targeting verticals like hospitality, enterprise, biometric security through its range of products and solution suite comprising projectors, commercial display units, EPABX, IP telephony, biometric ID solutions, VPCC solutions servers and storage devices, he said. Mr Rajiv Bhalla, Country Head (Sales and Marketing), said that by incorporating technology in the curriculum, the effectiveness of teaching could be enhanced. "Multimedia capabilities in educational environment help institutes increase operational efficiency and lower their total cost of operation." - **Our Bureau**
