#### **NEC launches 3D enabled projector**

The NP216G is a portable, lightweight DLP projector allowing users to experience high-quality 3D visuals. NP216G features 2500 ANSI lumens output for high contrast images (20000:1). With the help of 'Brilliant Colour' technology, the projector produces rich coloured pictures for an immersive 3D experience. The average lamp life is up to 5,000 hours with the use of its ECO Mode technology and lowers power consumption to 210W.
